In re Pro Se application of Mario Rabinowitz

Serial No. : 10/762,813

Filed: 1-22-03.

Title: Alignment of Solar Concentrator Micro-Mirrors.

Examiner: Unknown as of this date.

Art. Unit: Unknown as of this date, but **probably 2872.**

Preliminary Communication

Honorable Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Sir:

Please file the following enclosed papers related to the above named patent application:

I. Formal Drawings

Enclosed are 2 sheets of formal drawings to replace the informal drawings which were submitted with the patent application Serial No. : 10/762,813 ,

Alignment of Solar Concentrator Micro-Mirrors.

II. Information Disclosure Statement by Applicant

Enclosed is a 1 page list.

III. Petition to Make Special

Enclosed is a 1 page Petition to Make Special.

Respectfully submitted,
Mario Rabinowitz

No fee required as this invention will contribute to Energy Conservation.

PETITION TO MAKE SPECIAL

Pursuant to U.S. Patent Law, Manual of Patent Examining Procedure § 708.02, 37 CFR 1.102. *Advancement of examination*, the applicant, U.S. citizen:

Mario Rabinowitz

hereby petitions the U.S. Commissioner of Patents to make special his patent application for a

Alignment of Solar Concentrator Micro-Mirrors

The basis of this petition is that my invention will materially contribute to and promote the development of energy conservation resources. In the process of advancing the conservation of energy, my invention may also be expected to enhance the quality of the environment. My invention will make solar energy practical in allowing the solar energy conversion system to be low in capital cost and inexpensive to install. In its capacity as a power producer, it can be utilized with far greater safety, simplicity, economy, and efficiency in the conversion of solar energy. It will thus also benefit the environment in obviating the necessity to use other polluting energy sources.

I pray that the The United States Patent And Trademark Office will accord "special" status to my patent application for the reasons given above.

Respectfully submitted,

Mario Rabinowitz
